

Stormwater Annual Review Guidelines

Why: *“Only rain in the storm drain.”* An annual review helps to protect water resources and improve water quality. It ensures that stormwater (rain) leaves your property unpolluted or clean. And it ensures that non-stormwater such as irrigation runoff or animal wash water does not leave your property. An Annual Review is required by regulation.

What: An annual review is your examination of your facility and operations.

When: To be most effective, the annual review should be conducted just prior to the rainy season (November 11 through April 30). Scheduling the review on your calendar can be a helpful reminder.

In addition, periodic inspections throughout the rainy season, particularly just prior to and during a rain event, can help protect water quality. Visual observation during the first hour of a rain event can reveal problem areas and possible pollutants leaving your site.

How: Take a look at all areas of your property and all activities taking place while keeping pollution prevention in mind.
Make a record of what you reviewed and any problems you may have found. Use the checklist on the other side if you wish or make your own record.

Keep the record of your review at your site. If requested, submit the review record by any of the following methods:

Return in person or mail to:

Ag Water Quality Program
Department of Agriculture, Weights and Measures
County of San Diego
5555 Overland Ave, Ste 3101
San Diego, CA 92123-1256

Fax to:

Attention: Ag Water Quality Program
858-694-3845

E-mail to your inspector at: _____

Any Questions: You may contact your inspector or the Agricultural Water Quality Program at 858-694-8980.
